

The 3 Biggest Reasons to Choose UrthPact Straws

...and a few others too.

Certifications help mitigate risks to customers when purchasing compostables; you can rest assured there's no greenwashing. UrthPact is proud to say that all of our products lines are 100% certified compostable.

TUV OK compost HOME

TUV Austria's OK compost HOME protocol and certification is the **only** protocol and certification worldwide for home compostability. Based on a variety of test standards from Australia and other countries, it requires full physical decomposition in **6 months** and full compost formation in **1 year**.

100% Made in the USA

Made in an SQF (Safe Quality Food) facility

TUV OK compost INDUSTRIAL

TUV Austria's OK compost INDUSTRIAL protocol is the internationally recognized equivalent of the US's BPI (Biodegradable Products Institute) certification. Based on the EN 13432 test standard (equivalent to ASTM D6400), it requires full compost formation in **180 days (6 months)** under specialized conditions.

certified MARINE DEGRADABLE

Our straws are made from materials that are certified marine degradable under TUV Austria's OK biodegradable MARINE protocol. OK MARINE is based on a variety of worldwide test standards, including ASTM D6691. It requires complete physical breakdown in **3 months** and biodegradation in under **6 months**.

Proven to biodegrade anaerobically in landfills
